Visual Studio
CodePen
Figma

Work Experience

AeronFly

Back-end Developer, Aug 2021 – Present

As a backend developer at AeronPay, I've gained valuable experience by working on diverse projects and tackling multiple tasks. This role has allowed me to learn new programming languages and embrace innovative technologies, fueling my passion for continuous growth in the tech field.

Projects

Gemini Clone

HTML, CSS, ReactJS

Developed a fully responsive Gemini clone using ReactJS, incorporating both front-end designs and backend functionality. Implemented dynamic features and interactive components to replicate the user experience, ensuring seamless responsiveness across all devices and screen sizes.

My Doctor

HTML, CSS, JavaScript, Laravel, MySQL

The application includes features such as secure user authentication (login/logout), dynamic appointment scheduling, and a user-friendly interface for patients and doctors. Implemented a MySQL database to efficiently store and manage user and appointment records, ensuring smooth and reliable system operations.

Generate AI Image

HTML, CSS, ReactJS

Built an application that generates images based on user prompts by integrating with the OpenAI API. The system processes user input, retrieves the generated image, and displays it dynamically in the same interface, providing a seamless and interactive user experience.

WebSite Template

Figma

Designed a comprehensive Figma prototype, creating multiple screens for various pages with thoughtful layouts and user-friendly designs. Incorporated diverse fields and components to ensure functionality and visual consistency across different sections, focusing on an intuitive and engaging user experience.

Education

JECRC University, Jaipur

Master of Computer Application (IBM)
2023 – 2025

S S Jain Subodh P G College, Jaipur

Bachelor of Computer Application
2019 – 2022
